

You have the good set of sails.  
Give them the winch they deserve.

Automatic 4 speed winches from Pontos are more than just a simple evolution. They revolutionize the way the winch is used and bring performance to everyone.

More power for every turn of the winch handle!

	Std Gear 1	Std Gear 2	Ultra-Power	Pump Gear	Power Ratio
WINCH TRIMMER 4 SPEED	11,6 14 cm	40 4 cm	112,9 1,4 cm	32,7 5 cm	
WINCH STANDARD 2 SPEED	11,6 14 cm	40 4 cm			

MORE POWER

Power at your fingertips

## LET THE WHOLE FAMILY DISCOVER THE PLEASURE OF MANOEUVRES.

At last a winch which brings adjusting the sails within the reach of the whole family. Now, you are no longer the only one to manoeuvre. With Pontos, share your passion and set yourself free.

## AUTOMATIC 4 SPEED WINCH FOR 2 TIMES MORE POWER

The secret of the GRINDER: 2 additional gears which reduce the effort and adjust depending on the load on the line.

The result: your effort reduced by 50%!

- You can trim the genoa without struggling, whatever your strength or that of your crew.
- Benefit from the extra gearing to trim in comfort even in strong winds.
- Makes tensioning the sails a child's game.

## A BRILLIANTLY SIMPLE GEAR CHANGE

First turn the winch handle one direction and then in the other. Pontos technology does the rest.

MUCH MORE AFFORDABLE THAN AN ELECTRIC WINCH, AND SO MUCH MORE AUTHENTIC!

The TRIMMER winch is 100% mechanical. Not only does it save your batteries; it also retains the pleasure of the gest.

**Marion Vidal,**  
*First 35 (Arcachon) :*

Without any preparation at all I was given the task of trimming the genoa and it was magic. I turned the winch handle with my fingertips, literally. There was 20 knots of wind and I was able, quite easily, to react efficiently without any particular effort. There is a sense of ease which is totally unique.

**Jacques Trébaul,**  
*SunRise 34 (Morlaix) :*

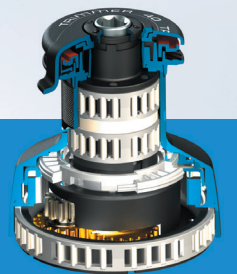

Really pleased with the TRIMMER winches on my Sunrise 34, especially when I'm with my wife, they've changed my life!

**Jean-François Fousson,**  
*Jouet 37 (Quelmer)*

I sail short-handed with my wife. Your winches work wonders: we can fine trim our 50 m2 genoa easily.

## DESIGNED IN FRANCE AND BUILT TO LAST

Drum in hard anodized aluminium, gears and clutch in 17.4 PH stainless steel and copper aluminium alloy, needle bearings in polyoxymethylene.
