

**Karl Dehler, Project Manager / Development of Hanse Group, about VuPlex:**

VuPlex really convinced me!

My first thought „not again just a new miracle cleaner which does everything“ has not been confirmed. VuPlex works simply different, much faster and more efficient performing then other cleaners I´ve used so far. Much better than I expected!

I have tried VuPlex on my more than 20 years old Dehler Camper carefully on a small spot of an Acrylic window, but then cleaned, polished and maintained all windows and composite parts.

Simply spraying on, polishing, done. All micro scratches, coming from even careful cleaning over all the years, got invisible. New dirt and contamination cannot stick to the surface due to it´s antistatic & repellent property leaving the surfaces as new and avoids micro scratching by cleaning.

VuPlex simply is a persuading product which I strongly recommend.

Regardless to be used on our yachts at Dehler, or on my camper van. I maintain all my acrylic and composite surfaces and parts with VuPlex.
